EDUCATION

CMR College of Engineering & Technology

Hyderabad, India

B.Tech – Computer Science & Engineering (AI & ML Specialisation) | CGPA: 7.80

Aug 2023 – May 2027 (Expected)

– **Coursework:** Data Structures & Algorithms, Deep Learning, NLP, Operating Systems, Distributed Systems, DBMS

– **Leadership:** President – Entrepreneur’s Club | Brand Ambassador – Computer Society of India (Hyderabad Chapter)

PROJECTS

suvyAikth – Intelligent Learning Ecosystem | Flutter, Gemini 2.0 Flash, Gemma 3, Imagen 4 1st Prize – IIT Bombay Techfest 2025

- Built an accessibility-first educational platform with a hybrid inference engine that switches between offline **Gemma 3** for on-device OCR/summarization and **Gemini 2.0 Flash** for adaptive RAG-based quizzes.
- Generated real-time **Imagen 4** visuals and multi-character interactive mascot sessions via Gemini API, improving engagement across diverse learner profiles.
- Engineered a “Blind-Friendly Mode” using a custom Morse code haptic feedback engine that converts AI-generated lessons into vibration patterns for visually impaired students. [\[GitLab\]](#)

CDSS – Clinical Decision Support System | Next.js 15, Gemini 2.0 Flash, Gemini Veo, Firebase

GFG ByteQuest 2025

- Built an educational clinical tool using **Gemini 2.0 Flash** that extracts symptoms via NLP, generates ranked differential diagnoses with confidence scores, and surfaces urgent red flags for review.
- Integrated **Gemini Veo** to produce pathway-specific AI consultation videos; persisted all case data and AI outputs to **Firebase Firestore** achieving sub-100ms read latency. [\[GitHub\]](#)

IntelliCredit – Hybrid Credit Decision Engine | Java Spring Boot, Python, FastAPI, Docker Compose

- 3rd Prize – IITH Vivriti Hackathon Project Lead and Architected a microservices credit state machine in **Spring Boot** with a Pricing Matrix Service and hard-reject rules ($DPD > 30$, $Score < 450$) to fully automate underwriting decisions end-to-end.
- Async REST calls to a **Python ML worker** (Random Forest + Isolation Forest) with Databricks audit-trail ingestion cut manual CAM generation time by ~70%. [\[GitHub\]](#)

Advaita – Open-World Game AI | Unreal Engine 5.5, C++, Blueprint

Sep 2024 – Present

- Designed a dual-narrative procedural generation system with C++ finite state machines governing gameplay transitions, branching AI behavior trees, and dynamic event triggers in **UE5.5**.
- Engineered frustum culling and multi-tiered LOD (high-poly active POV, low-poly background geometry) to sustain stable FPS under heavy cinematic and particle loads.

LEADERSHIP AND CAMPUS INVOLVEMENT

Entrepreneur’s Club, CMRCET & CSI Hyderabad

Hyderabad, India

President | Brand Ambassador

Aug 2025 – Present

- Defined the college startup ecosystem roadmap; mobilized 500+ students across pitch competitions, investor workshops, and hackathon squads, growing active membership by 40% in one semester.
- Coordinated student leads, faculty mentors, and industry speakers to deliver 10+ events per semester, establishing pipelines for internship referrals and early-stage funding exposure.

SKILLS

Languages: Java, Python, C++, Dart, SQL

Backend: Spring Boot, Spring MVC, REST APIs, Microservices, JUnit, Maven, MySQL

DevOps & Cloud: Docker, GitHub Actions, AWS EC2, Linux, Git

Frameworks & Tools: Flutter, Next.js, LangChain, Firebase, Unreal Engine 5

CERTIFICATIONS

- **Claude Code in Action** | Anthropic Feb 2026 verify.skilljar.com
- **HPE Software Engineering Job Simulation** | Hewlett Packard Enterprise × Forage Jul 2025
- **AWS Educate: ML Foundations & Introduction to Generative AI** | Amazon Web Services 2025 credly.com
- **Introduction to Data Science** | Cisco Networking Academy 2024 credly.com
- **Networking Basics** | Cisco Networking Academy 2024 credly.com
